Re-Prohibition

As is well known an intensive and persistent effort, backed by millionaires and multi-millionaires, has been going on to defeat prohibition and temperance reform.

One of the great reasons no doubt is that whenever prohibition is defeated the sale of booze increases by leaps and bounds and the stock of breweries proportionately increases in value.

The great argument still used is that the law is broken and leads to bootlegging. Any one who has lived in Crossfield or Alberta since prohibition was defeated, and has read the newspaper or kept his eyes open would hardly dare to state that bootlegging had in any way diminished. If prohibition does not prohibit as it should it is our business to see that it does prohibit and not throw up our hands helplessly before the forces of lawlessness.

Why does not some one urge a campaign to get rid of the law against stealing?

Because there are so many robbers and so much petty thieving surely it is time to do away with law and put stealing under Government control. If people were only allowed to steal in moderation when they are hungry the difficulty would be solved. Let us not be hood-winked in this matter but face the issue squarely.

The individuals and homes that are being ruined in increasing numbers under our present system is surely a sufficient condemnation.

H. YOUNG.

Calgary Athletics Play Here Sunday

The Calgary Athletics, the fastest amateur baseball team in the city, will play the local nine here on Sunday, starting at 3 o'clock.

Manager Bills will start a strong team, with the new pitcher "Speed" Gehrig on the mound. Gehrig was unable to play last Sunday as he has been under the doctor's care. Dr. Whillans states that he is improving nicely and it looks now as if the big Dutch man will be ready to do his stuff on Sunday.

Here's the line-up:

Crossfield—P. Stahl c Gehrig p. Angus Robertson p. Bob Smart 1b. Eddie Schneider 2b., Jimmie McDowell ss Phil Weber 3b. Everett Bills of George McKay rf. Ira Heywood lf. R. McFadgen p.

If these boys play to last year's form it will be just too bad for Calgary.

Olympic Trials at Calgary On Saturday Afternoon

The Olympic trials to be held at Mewata Park, Calgary, on Saturday next, should be of interest locally as Miss Margaret Fitzpatrick, and Mrs. Glynn Jones, will compete.

Miss Fitzpatrick, holder of two Canadian records, has had no trouble in recent weeks out in posing the best in Calgary in the intermediate classes. Margaret is entered in the 100 meters.

Mrs. Jones in a work-out at Calgary on Wednesday of last week, clipped two seconds off the Alberta record for the 440 yard dash.

Mrs. Jones (Dorothy Crocker) was an outstanding star in both the sprinting and jumping events previous to her marriage, and her comeback now will be watched with interest by her many friends in Crossfield.

Miss Veva Green, who was well up in the high jump at the Dominion meet last year will not compete at Calgary on Saturday owing to an injury, but hopes to be ready to take part in the Provincial meet later on in the summer.

A. S. Gough, Reeve of the M. D. of Rosebud was a business visitor in town on Tuesday morning.

Rosebud Council Meeting

Excerpt from the Municipal District of Norma Council meeting held on Saturday, June 17th.

It was agreed to accept the offer of the Soldier Settlement Board to pay arrears of taxes if penalty canceled.

A donation of \$20.00 was granted to Carstairs School Fair.

Information was given regarding the amendments to the Weed Act.

Purchase of two 8 ft. road mowers was approved.

The sum of \$5.00 was granted in aid of Carstairs Children's Sports Day.

How Is Your Rhubarb?

With copious rains, followed by warm weather, garden stuff is certainly growing apace, and rhubarb especially is showing rapid growth. On Saturday Mr. Jas. Aldred went out to his garden to see how his favorite plant, a seedless variety of rhubarb, was growing. To his astonishment there stood an enormous stalk, which was later measured and found to be four inches and a quarter in diameter. Next

THE CONSUMER PAYS FOR ALL

It is private enterprise that calls for protection and rating relief; coal, wheat, and beet oil for subsidies, and the railways that need a government chairman to protect them from their competitors. And it is the consumer who pays for it all. Nobody, though, pays the consumer. He is left to himself, and his co-operative societies plod steadily along, balancing their budgets whilst nations cannot, and progressing whilst private industry demands artificial aid to keep it alive.

Nobody thinks it at all marvelous. Our societies do not go bankrupt, and we have no millionaire directors who might commit suicide. Otherwise our business might fill a few columns in all the papers. As it is, paying your own way is not sensational, even in these days of national bankruptcies and enormous budget deficits.—From "The Wheathead."

Herefords are in Demand

Angus Robertson of the Ranch bought five head of pure bred Hereford bulls from Frank Collcutt on Saturday. The Robertson interests are the pioneer ranchers of the district and are well known as breeders of export cattle, and have won many prizes in Western Canada Shows with carloads of beef cattle.

Pass Music Exams. With Honors

In the report of the Royal School of Music examinations held in Calgary recently we notice that Arlene Amyer of Crossfield, passed her elementary division with distinction and that Violet Currie passed with honorary mention.

Dr. W. H. Harris of Oxford was the examiner.

Car Licenses Reduced

Motor car licenses have been reduced \$5.00 from June 15. On and after August 1, licenses will be further reduced to half the original price.

No N. S. F. Cheques Now

At a special meeting of the Village Council held on Monday, J. Belshaw was appointed to act as Bailiff for the Council and to make seizures for arrears of taxes.

Frank Mair met with a painful accident on Thursday of last week while plowing, in some way his foot caught in the wheel of the plow causing a wound that required several stitches.

We notice Rev. Young has traded off his Durant car for a Pontiac. The Durant has been giving him lots of trouble of late and like the old grey mare "she aint what she used to be."

Banish all of Winter's traces with Alabastine. Can be used on any interior surface, inexpensive, economical — so easy to apply.

EASY TO USE

Mix Alabastine with hot or cold water and apply with a soft bristle brush.

The Imperial Economic Conference

The Imperial Economic Conference, shortly to be convened at Ottawa, is unquestionably one of the most important gatherings ever called in the history of the British Empire. In fact it may easily prove to be one of the most important in the economic history of the whole world, because, whatever decisions it may reach will affect not only the British Commonwealth of Nations but all nations.

There will be assembled together all the leading governing statesmen of the Empire, supported by the strongest possible groups of financial, economic, commercial and other experts that the Old Country and each of the Dominions can gather together. For months past, these statesmen and experts, assisted by small armies of lesser experts and advisers, have been compiling and studying trade and monetary statistics, weighing the effect of this and that, probing as never before into the productive capacities, primary and industrially, of their countries, the natural resources, the state of employment, the requirements of their respective populations, the probable and possible trend of future developments and the extent thereof, and the effect of existing policies and possible future policies upon all these matters which enter into national and Empire growth, prosperity and strength.

And the object of it all is to evolve, if possible, new policies acceptable to all parts of the Empire, and which will prove of mutual advantage to all, and having as their objective the encouragement and development of a larger volume of inter-Empire trade. This means that the possibilities and the requirements of each part of the Empire must be ascertained, must be appreciated by all the other parts, and the whole dovetailed together to the advantage not only of each component part, but of the whole.

It becomes at once self-evident, therefore, that one of the major tasks confronting the Conference will be to find ways and means of removing existing barriers to the free exchange of commodities between one part of the Empire and other parts, to the mutual advantage of both; and, without in the process, working injury to any part. While the Old Country representatives, and the representatives of each of the dominions, must, of necessity, give particular heed to the interests of their respective nations, it is an essential to the success of the Conference that this be done in no narrow, selfish spirit, but in such a way that while benefiting their own country they likewise confer benefits on the sister nations.

This does not mean that the spirit of approach to the intricate problems calling for solution should be one of making sacrifices; rather it should be in the direction of striving for mutual advantages. In fact the word "sacrifice" should be entirely absent from the Conference, while the term "mutual advantage" should be very much to the fore. In a word, the dominating ideal should not be that expressed in such slogans as "Britain First," "Canada First," "Australia First," but, on the contrary, it should be an adaptation of the motto of the Three Musketeers, "All for One, and One for All."

Along with the removal of existing barriers, a mutual understanding or agreement that no new barriers will be erected, there must naturally develop policies designed to make ever easier the flow of trade into and out of all parts of the Empire to all other parts. This may involve the ultimate creation of a new system or method of monetary exchange, even an Empire currency. It would seem to be essential that some system be developed whereby the currency of any one part of the Empire should always be on a par with the currency of all other parts, so that the same monetary standard should appear at all times throughout the Empire, and that for example, at no time should the Canadian dollar be at a discount with the British pound, or vice versa. The guarantee of such a standard would undoubtedly be of tremendous assistance in establishing and maintaining inter-Empire trade at a maximum, removing, as it would, much of the uncertainty and loss which now prevails.

If the forthcoming Conference can achieve a measure of success along these and other lines having the same general object in view the beneficial effect upon all parts of the British Empire will be almost incalculable. Not only so, but no other trading nations could afford to ignore such a development. The breaking down of trade barriers within the Empire would quickly force the breaking down of trade barriers by all other nations. It would be the beginning of a reversal of the suicidal policy into which the world has drifted and which has resulted in an almost complete paralysis, or destruction, of international trade and commerce, ending in the present state of world depression, unemployment, suffering and hardship.

Canadians may well be proud if, from their national capital, there is even a new economic policy for the Empire and the world. That this should emerge from the Conference should be, and we believe is, the fervent desire and hope of the Canadian people irrespective of any minor political differences of adherence to special schools of economic or fiscal thought.

Only Three in Existence

Sell Seed On Certificate

Silk-Cotton Tree Attraction For Tourists At Nassau

Among the many attractions for American tourists at Nassau, in the Bahamas Islands, is the famous silk-cotton tree, which rises seemingly like a pyramid, then, at the top, branches off in clumsy shoots. The trunk of the tree flares out curiously into ribbon-like formation. There are believed to be only three silk-cotton trees in existence.

There are two kinds of people: Those who aren't hateful by nature, and those who speed up when somebody toots to pass.

The man who says the right thing at the right time is rare. But not half so rare as the man who says nothing at the right time.

Air service between Cuba and the Isle of Pines is increasing.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Island Prison For Doukhobors

D'Arcy Island, Near Victoria, B.C.
To Become Place of Banishment
D'Arcy Island, about 20 miles from Victoria in Haro Strait, will become the home of some 300 Doukhobor men, sentenced to serve three years each for militant pacifism.

The announcement of the creation of the island prison settlement was made by Oscar Bass, deputy attorney-general, on receipt of announcement from Ottawa of the decision. The Dominion government will almost immediately commence erection of such additional buildings and other accommodations as may be required.

The Doukhobors will be provided with agricultural implements that they will be able to raise food-stuffs for their own maintenance.

D'Arcy Island was the site of a leper colony many years ago, but it has been closely inspected by medical officials, and has been given a clean bill of health.

It is understood that the Doukhobors will be provided also numbering some 300, will be placed in a number of Dominion institutions in eastern Canada.

A total of 594 adults have been arrested. Three hundred and fifty-nine children will be cared for in various British Columbia institutions. Thus a total of 953 persons, men, women and children, are affected by the action of the Dominion and British Columbia governments in their efforts to establish peace in the portion of the interior of the province in which the Sons of Freedom sect of Doukhobors have lived. The countryside there has been in a state of unrest for years, with nude parades, burning and bombing and consequent menace to life and property.

Remarkable Success Of English Surgeons

Girl Walks After Spine Built Up By Foot Bone

As the second remarkable operation—the first of its kind in England—a girl, who for eight years was unable to walk, has returned home cured.

She is Miss Jessie Exton, 17-year-old daughter of Mr. and Mrs. William Exton of Duke Place, Worksop. Up to the age of nine Miss Exton was a lively child, but her spine became affected by a tubercular disease, and for three years she was a patient at the Mansfield sanatorium.

She made progress, but a fall after she had returned home aggravated the disease, and she was again unable to walk.

The case was brought to the notice of the Duchess of Portland, and Miss Exton was removed to the Duchess' Orthopedic Hospital at Herne Wood, Nottinghamshire, where the operation was performed by Mr. Malcolm, the senior surgeon, who used a piece of bone from the left foot to build up the spine.

Miss Exton is now able to walk normally except for long distances.

She has since visited Harlow Wood to show the success of the operation to 80 doctors from all parts of Europe.

Arctic Expedition

S.S. Ungava: To Carry Mail To Mounted Police Posts

This year's expedition to the eastern Arctic, Baffin Island and Hudson Bay will be undertaken in the S.S. Ungava, which will sail from Montreal, Quebec, in July. The vessel will carry mail to Mounted Police posts and missionary stations, and will convey relief of personnel stored etc. All points in the eastern Arctic, to as far north as Bache Point, the most northerly police and customs post in the world, will be visited in the course of the Ungava's voyage.

Slightly Mixed

The minister of a certain university was preaching on "Faith," and, in declamatory heat, told his audience: "You have blind faith in the physician. He gives you medicine and tells you to take it. 'Yours not to reason why; yours to do and die!' Almost equal to this is the story of the minister who solemnly assured his congregation that 'Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth!'

Baldly Taken In

A man was persuaded by a dealer to give several guineas for a jar which, he was assured, was of great value.

The collector showed his prize to a considerate friend, who examined it thoughtfully.

"How much did he rock you for?"

"Seven guineas."

"Well, well! And he didn't throw in the marmalade."

Sonended Alive

Dr. A. Gauduchau, of Paris, makes use of a principle of physiology and injects sausages and seasoning directly into the blood streams of chickens. He says this aids the flavoring in penetrating the meat and none is necessary on cooking the fowl.

A German scientist states that loss of 40 to 50 hairs from the head in a day is the "normal" limit.

Automobiles are owned on 58 per cent of the farms in the United States.

Death Of Pioneer

Col. Herbert Swinford, Veteran Of Red River Rebellion, Dies In Winnipeg

Col. Herbert Swinford, veteran of the Red River Rebellion of 1870, and the North West Rebellion 15 years later, died recently in Winnipeg at the age of 83.

Born at London, England, he came to Canada with his parents as a boy and joined the Royal Engineers. When Lord Wolseley was forming his expedition.

Following service, Col. Swinford operated steamboats on the Red and Assinibine Rivers here. Later he was appointed general agent for the Northern Pacific Railway in Winnipeg. For several years he occupied the same position at Vancouver and returned to Winnipeg only six months ago.

He is survived by his wife, a son and a daughter.

Study Polar Phenomena

Saskatoon Professor To Be Member Of Party To Be Located At Chesterfield Inlet

In the special study of polar phenomena to be conducted in 1932 and 1933, in which over 100 meteorological stations will take part, Saskatchewan will have a special interest in the party of four to be located for a year at Chesterfield Inlet in the northwestern corner of Hudson Bay.

Professor Charles, professor of physics at the University of Saskatchewan, will be a member of the party, which is under the direction of Frank Davies, at one time an instructor in physics at the University at Saskatchewan. Mr. Davies was a member of the Byrd Antarctic Expedition and spent a year making weather observations there. He is well known in Saskatoon and was married here last summer.

No Fool-Proof Rule

Mushroom Depend On His Own Judgment

The public's desire for a fool-proof rule by which to distinguish an edible mushroom from a poisonous one is doomed to unfulfillment. Dr. Fred Seaver, curator of the New York Botanical Garden, said in a lecture at New York.

"There is no such rule," he stated.

"One must learn to know the mushrooms and to distinguish them as you would your friends from your enemies."

Dr. Seaver said that to the mycologist or student of fungi, there was no significance in terms "toadstool" and "mushroom."

"A mushroom is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

Waited Many Years

Woman Graduated Over Half Century Ago Just Received Diploma

An 88-year-old woman, who waited 65 years for her diploma, received it at Bates College commencement. The woman was Mrs. Shyl Chase Ballard, of Minneapolis, Minn., who completed her course at Bates in 1876, but failed to receive her degree because the college did not then confer them on women. Bates now is a co-educational institution.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membranes. Treatment with Dr. Thomas' Eclectic Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Disarmament Responsibility For Its Ultimate Solution Rests Primarily With the Great Powers

Disarmament was a political problem and the responsibility for its solution rested primarily with the great powers, Sir George Perley declared at Ottawa. Sir George, who headed the Canadian delegation to the Geneva disarmament conference, was addressing a joint gathering of the Ottawa branch of the League of Nations Society, the National Council of Women, the Women's Canadian Club of Ottawa, and the Canadian Club of Ottawa.

Efforts towards that end, he stated, had been initiated and carried on at Geneva by private conversations among the representatives of the nations chiefly concerned. Many things had occurred to interfere with and prevent the success of the recent deliberations. There were the elections in France; the illness of Premier Ramsay MacDonald; the necessity of United States Secretary of State Stimson returning to his country; the precarious position of the then German Chancellor Herr Brueining who had only recently resulted in his resignation. Much had been done in spite of circumstances. Sir George said in voicing his belief in the work of disarmament and the League of Nations.

A most important resolution on qualitative disarmament had been passed at the Geneva gathering by unanimous vote to the effect that any armaments which were found to be either aggressive in character or particularly dangerous to the civilian population should be removed from national control.

The technical work of the conference was still progressing. Sir George stated, and political conversations would be resumed later when it was hoped conditions would be more propitious for further progress towards the objective which all so greatly desired.

"Education and not emotionalism must be the broad, fundamental basis for the development of international good will leading to permanent peace and to disarmament," declared Miss Winnifred Rydd, Montreal president of the National Council of Women of Canada, one of Canada's three delegates to the conference.

Miss Kydd dealt with the preliminary work of the Conference sub-committee on moral disarmament of which she was a member, having as its object an intense study of how the public opinion of all countries of the world may be mobilized in the interests of peace. The moral disarmament committee, Miss Kydd indicated, intends to utilize the press, the radio and the moving picture in its peace propaganda work.

Referring to the presentation of the polyglot petitions for world disarmament at the conference, Miss Kydd stated that the Canadian petition, bearing 500,000 names, was given a prominent place when the petitions from all countries were placed on display.

Interesting Discovery

By Archaeologist

Finds Another Secret Passage In Old Palestine City

Sir Flinders Petrie, the veteran archaeologist who has unearthed so many of the secrets of the past, is still actively excavating at Old Gaza, the great city of Palestine which was well known to Abraham. The latest announcement in connection with his work is the discovery of another secret passage leading from the city out into the desert. A great tunnel, leading under the walls and nearly 500 yards out into the desert, was found last year, and constitutes but one of the many features of the fortified city which military experts do not yet fully understand. Sir Flinders estimates that it will take another 50 years to excavate the area yet to be explored.

Hathas Diver: "Runny, I have the feeling that I have forgotten something!"—Musket, Vienna.

W. N. U. 1947

Making Final Test

Rust-Resistant Varieties Of Wheat Being Tried Out

For the purpose of considering and advancing upon the solution of urgent problems of agriculture in all the major divisions of Canada—the Maritimes, Quebec and Ontario, the prairies and British Columbia—the newly-formed national advisory committee on agriculture of the Committee on Research Council met in Ottawa.

Dr. H. M. Tory, president of the council, stressed the need of co-operation and co-ordination in working out national problems.

Dr. Robert Newton, acting director of the division of biology and agriculture, recounted the enormous progress made in the last decade through research organizations working in co-operation.

He stated that rust-resistant varieties of wheat from all the agencies which developed them have been pooled for final test. Those selected are being tried out at numerous points, and the resulting grain is to be studied by laboratories of the Dominion Department of Agriculture and the three provincial universities in the west.

The grain research committee since its inception has undertaken several major special investigations. Dr. Newton said there was now in progress the final report on the investigation of the drying of grain "which should clear up all points likely to arise."

Numerous complaints regarding the effect of the combine method of harvesting on grain have resulted in the inauguration of an elaborate investigation.

Scottish Market For Cattle

Good Prices Are Obtained For Cattle Shipped From Saskatchewan

Higher prices than anticipated have been realized on the first shipment of Saskatchewan cattle to Scotland, according to a report received by the Department of Agriculture from G. B. Johnson, Canadian Trade Commissioner at Glasgow.

The Scottish market offers a good demand for choice steers, weighing from 10 to 11 hundred weight, capable of being made into prime beef with three or four months' fattening, according to Mr. Johnson. The market above meets all of this type between April and July, in the spring season, and from September to December, in the autumn.

Grow Fat and Laugh

According To London Doctor Laugh Comes Second

Having believed for so long in the advice, "Laugh and grow fat," we must change our ideas according to a London doctor, who finds that the growing fat precedes the laughter.

From his study of children he has found that fat babies are the happiest, good temper runs in families and girls have better tempers than boys.

So there goes by the board that other belief that the fat man is good tempered because he is too stout either to quarrel or run away. He just can't help his happiness and senility.

Funds Quits Safe

Business was over for the day and the two partners had adjourned for a game of snooker in a nearby hall. As the evening was nearing its end and they were preparing to go home one of the partners, in a fit of impatience, hit his brow and emitted a shrill scream.

"We're ruined! We're ruined!" he shrieked. "Just remember that I left the safe door open when we closed the shop."

"Oh, that's all right," replied his business mate easily. "We're both here, isn't we?"

B.C. Salmon

British Columbia's output of canned salmon in the five-year period, 1927-1931, averaged 1,540,744 cases annually. Despite the fact that market conditions resulted in the 1931 output being much below normal, the average production in 1927-31 was only 92,000 cases below the average for the preceding five years.

In 1339 half of England's troops were archers, and by 1360 practically all of the archery troops were mounted. The men used a bow about five feet in length, and a three-foot arrow.

Springs hold a spoon on a French inventor's device to be clipped to the edge of a kitchen utensil.

Refitting Old Vessel

Clipper Ship Built In 1876 Will Sail Seas Again

The day of wooden ships and iron men has not yet gone by.

The bark "Coriolanus," once Queen of the Jute Clippers, has sailed for Bath, Me., to be fitted out in the same powerful square rig in which she established a sailing record between London and Calcutta years ago.

Refitted, the then full rigged clipper ship will sail out of Boston to again engage in trade with Africa.

She has sailed under six flags over the seven seas. Her prow has churned waters of the Arctic and the tropics and she has survived hurricanes and fro at sea to become last of the old New England clipper ships still in service.

A syndicate headed by C. Nelson Rogers of Boston recently purchased her and will return to that port immediately after her new spars have stepped into place at the Bath Iron Works, Bath, Me. At Boston she will take on a cargo for a trading voyage to Africa.

She was built at Dumbarton, Scotland, in 1876, and was awarded a gold medal by the Honorable Shipwright's Guild of London for the most beautiful lines of any clipper ship then afloat. The "Coriolanus" established a record of 69 days between London and Calcutta and the record has never been lowered by a sailing ship.

In recent years she has engaged in the packet trade between New Bedford and the Cape Verde Islands.

Forage Crop Regulations

Rules Governing Production Of Registered Seed To Apply

Regulations governing the production of registered seed in future will apply to forage crops, delegates to the annual convention of the Canadian Seed Growers' Association decided. A complete set of rules, for immediate use, was adopted at the meeting held in Winnipeg.

Notices given in the recommendations mention approved methods of designating strains of forage crops, progress in the registration of corn and red clover, and recognition of strains and specified types within varieties of forage crops.

Cost Of Horse Labor

Records Show Cost Of Work Horse At Six Cents Per Hour

The Superintendent of the Federal Experimental Station at Indian Head, Sask., has provided some interesting and timely information about the seasonal cost of work horses under prairie conditions.

The records kept in connection with the experiments had the average cost of feed for the season of active farm operation was \$82.15, while the average number of hours worked was 1,540, which represents a work value, on the basis of 6 cents per hour, of \$110.98.

Still Ding Good Business

That the horse has not been replaced by machinery on modern farms is shown by the fact that the Canada Wood Specialty Company of St. Marys, Ontario, is now filling an order for 75,000 curvy comb handles. The curvy comb is used principally for cleaning horses, though quite a supply goes to fishermen. An average of about 500,000 are sold annually in Canada.

Arsenic can be used advantageously in wood preservation processes.

QUEEN MARY ADMIRERS BEAUTIFUL SHOW

One of the annual events in London which their Majesties never miss is the Chelsea Flower Show, where some of the most beautiful floral displays in the British Isles are on view. This photograph was taken as Her Majesty left the Royal Party to admire a particularly attractive corner of the show.

Will Use Rubber Bayonets

Sixteen hundred rubber bayonets, exact replicas of those used by British troops in a battle with Russian infantry on the slopes of Inkermann in October, 1854, are being manufactured by a British firm for use in a Crimean fighting scene which will be staged at "The Aldershot Tattoo," to be staged at Rushmore Arena. The bayonets are said to look exactly like the real thing with their silver-gray blades and black handles.

It took George Forbes, of Ripon, Wisconsin, only two weeks to build a seven-foot model locomotive, in which only steam pipes and rods are of metal.

Measurements of the force of gravity at various points throughout the country are made by the Dominion Observatory, Department of the Interior, Ottawa. This involves the measurement of the period of a pendulum to one ten-millionth part of a second—a decidedly delicate operation. Results of these investigations are intended to throw light on the nature of the upper layers of the earth's crust, and are closely related to geological formations and structures, and such processes as denudation and mountain building.

To attract incoming cargoes to Port of Churchill

The opening of ports on the Gulf of Mexico did not hurt, but rather helped, United States Atlantic ports, and there is no reason to believe that the opening of Churchill will injure any other Canadian port. Unfortunately, there are always short-sighted people who do not see it that way, and Churchill will continue to receive adverse publicity from Eastern Canadian sources.

To offset that publicity some special encouragement should be given to attract incoming cargoes to Churchill—Winnipeg Tribune.

Norfolk Fishermen Are Superstitious

Claim Weather-Vane Depicting Crow Brings Bad Luck

Mariners are notoriously superstitious.

The local governing council of Crook, the agreeable little township on the Norfolk coast, is respecting the superstition of the local fishermen in regard to the weather-vane which depicts a large crow which was erected recently by the council. The fishermen say the weather has been consistently bad since the vane was put up, and they have not been able to catch so many crabs and lobsters. The crow, they assert, is "a bird of ill-omen," and an emblem of death.

In deference to these representations the vane is to be taken down and a new one, depicting a ship in full sail, is to be set up.

Standardized Automobile Insurance

New Plan Comes Into Effect In Ontario This Year

Standardization of automobile insurance policy forms becomes effective in Ontario September 1, the provincial insurance department announces.

The insured motorist will be automatically responsible to his victims under the new regulations. The standard form says that every company shall be liable to the victim of an accident under all circumstances. If the policy holder has violated the statute, the company must seek redress against him.

Encouragement Needed

To Attract Incoming Cargoes To Port Of Churchill

The opening of ports on the Gulf of Mexico did not hurt, but rather helped, United States Atlantic ports, and there is no reason to believe that the opening of Churchill will injure any other Canadian port. Unfortunately, there are always short-sighted people who do not see it that way, and Churchill will continue to receive adverse publicity from Eastern Canadian sources.

WORLD HAPPENINGS
BRIEFLY TOLD

The National Government has contracted with a group of former military aviators to develop a Chinese air force.

Amelia Earhart received the Order of Leopold from King Albert of the Belgians in recognition of her solo flight across the Atlantic.

On her first trip through the Strait of Belle Isle this season, the Canadian Pacific flagship "Empress of Britain" again broke the record for Atlantic crossing.

Col. Herbert Siverton, veteran of the Red River Rebellion in 1870, and the North West Rebellion 15 years later died in Winnipeg at the age of 83.

Prof. J. W. Gregory, Scottish geologist, and head of a scientific expedition studying earth movements in the Andes, was drowned recently, a brief wireless report said.

The total value of output of the British Columbia Fisheries in 1931 was \$11,109,822, compared with \$23,103,302 in the preceding year, according to a report issued by the Dominion Bureau of Statistics.

The fruit bill of the United Kingdom went up by nearly £32,000,000 last year, according to a report issued by the empire marketing board, with oranges for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second.

Nearly 7,000 persons were killed and more than 20,000 injured in road accidents in England within the last twelve months, according to parliamentary returns. In London Metropolitan Police District alone, 1,326 persons were killed and more than 5,000 injured.

British Columbia lumbermen will send a trade delegation to China to foster trade with that country if a suggestion put forward by Hon. Nelson Lougheed, Minister of Lands, to the executive of the British Columbia Lumber Manufacturers' Association is adopted.

Not Much Difference

Vegetarians Healthy But Slow In Generating Body Heat

Experiment running over two years has been concluded at Kansas City where a professor has been observing 70 vegetarians and comparing them with meat eaters. He finds that the vegetarians do not generate body heat and energy as quickly as meat eaters, placing the difference at 10 per cent. The vegetarians, he said, do not appear to be more active or intelligent than any others, nor are they more apt to become sick. Apart from generation of heat he could see little difference in the two plans of diet.

New Discovery Valuable

Makes It Possible To Evaporate Plummet Like Water

Plummeting liquids can be evaporated like water by a discovery announced from the California Institute of Technology. This precious vapor, probably the world's highest-priced mist, condenses into unimaginably thin films upon a wide variety of materials. It coats them virtually permanently. Smoother than dew it will cover fibres, converting them into pliant, flimsy threads that seem made of pure platinum.

"Is your daughter going to practice on the piano this afternoon?" "Yes."

"Well, then will you please lend me your lawn mower? I have to do the lawn some time, anyway."

PERSONAL

SCOTTISH LADY AT PRESENT IN CANADA would like to take in charge one or two young girls. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady; in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and Britain. Would willingly give more information to interested party—apply Box 59, Winnipeg Newspaper Union, 175 McDermot Ave., East, Winnipeg, Man.

Had Original Ideas

New South Wales Bandits Out After Big Party

These are days of mysterious accidents, peculiar robberies and dastardly crimes of all descriptions. But one could not help but smile at the news despatch from Sydney, N.S.W. There bandits stole a brick wall 30 feet long and six feet high. Others took 30 locomotives all excepting the frames, while still others carried off part of a church. That story is somewhat along the lines of one of the "rackets" in the United States where high-pressure thieves will back a moving van to a home or an apartment and if nobody stops them, take the entire furnishings in one trip.

Keeping one's possessions is not as easy as it used to be, not even as easy as in the days when might meant right.

Leadership Of Prince

Hei To British Throne Is More Than Thirst

Because of his commanding position as heir to the British Throne and on account of his personal popularity, Prince George of Wales has an unusual opportunity for public service of a practical nature, and of this opportunity he is taking full advantage. He is more than a theorist, and whether his audience be composed of business men, industrialists or farmers, he speaks to them in their own language. They realize that he has made himself familiar with their problems. Leadership is the great need of the day, and this his Royal Highness is providing in an energetic and practical manner.

522

A BOON TO STOUT WOMEN—THE ADJUSTABLE SLIP

Its wrap-over front makes it shadow proof.

The stout anything more essential than a slender appearance than a well-fitting costume slip.

Todays model reduces the breadth of the figure and does it gracefully.

This is a narrow, saucy slip with a broad opening at the right hand side of the front. It is brought around the back and tied in a bow, adjusting the waist to suit its wearer.

There is a plenty of freedom for the hemline, and still retains the straitlining of the slip.

And to make it! You'll be amazed at it! Cut it out and practically only adjust the bust after the sides and shoulder seams are closed.

Style N. 522 is designed for sizes 36, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 4 1/2 yards of 36-inch material.

Price of pattern 25 cents in stamp or coin (coin is preferred). Wrap coin carefully.

WRITING WINS AUTOMOBILE

F. L. C. Bond, general superintendent for C.N.R., Montreal district, commanding C.N.R. brakeman Donat Cyr, of Montreal, after Cyr had received a new automobile—the prize he won when F. D. Jacob, for 15 years Dominion Graphologist, and other judges decided Cyr's writing was more interesting than any of the thousands submitted in the Imperial Tobacco's first series of contests wherein competitors wrote on the inside surface of Turret cigarette packages. At the left is W. B. Tingle, director of the tobacco company; A. Desrochers, also of the Imperial Company; J. E. Gibault, superintendent for C.N.R., Montreal district, and the winner himself, hatless. —Photo, Canadian National Railways.

Contract Bridge

By Hamlin B Hatch, Cavendish Club, Toronto

In my last article, I discussed the original System of Contract Bridge from the point of view of the fundamental differences between the Contract and Approach-Forcing System. Today's article has to do with the so-called One-Over-One variation of both these systems. The One-Over-One has been developed by Geo. Reith of the Knickerbocker Whist Club, New York. Many of the members of the club have assisted in bringing this system to its present state of excellence. The Four Horsemen of Bridge, i.e. Hal Sims, David Burnstine, Willard Karp, and Oswald Jacoby use this system and have won many national and sectional championships. Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system has helped them materially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same minimum requirements as the Approach-Forcing System, with the exception that with strong distributional hands, i.e. two suiters, the bidding may be opened with less than two and one-half honor or tricks. An example of this opening would be the following:—Spades A J 9 8 7, Hearts K Q X X X, Diamonds X, Clubs X X X.

2d. Provided there is no intervening bid and the partner of the opening bidder responds with a bid of one, other than one no trump, this response is definitely forcing and demands that the original bidder respond with a bid of one, holding for at least one more round. The difference between the Approach-Forcing and the One-Over-One is, that any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One simply requires that the bidding be kept open for at least one more round.

Example: If the opening bidder bids one diamond and second hand passes, then if the opening bidder's partner bids one heart, the original bidder must bid again.

The advantages claimed for this system by its advocates is, that the partners inform each other of their respective holdings at low bids, and also that this bidding conceals from the opponents the strength and weaknesses of the bidding hand.

With the system as strong as it is always the chance that the opponents will make a defensive bid and find themselves caught between the upper and neither milstones with the result that they suffer a substantial penalty.

2. The opening bid of two in a suit is based on losing tricks and not on honor tricks. In other words a two bid is made on hands which definitely assure the partnership of game even if the partner of the two bidder has a complete "bust".

The type of hands which lend themselves to this bid are usually powerful two suiters or a very powerful one suiter.

Example: Spades A Q J X X, Hearts A K X X X, Diamonds—None, Clubs X. In this hand even with a six spot high in partners hand, game is assured, as the original bidder has only three losing tricks.

3. The opening bid of three in a suit is a definite signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades A K Q J X X, Hearts K Q, Diamonds X, Clubs A K

X. If after a three spade bid the response is four diamonds alam is definitely assured in spades. This is the only situation in any of the systems so far discussed where ace showing is countenanced.

4. In all other situations except those outlined above, the One-Over-One has no variations of consequence from the Approach-Forcing System. The weak no trump response is used to show a balanced one to two trick hand. All no trump bids other than jump no trump and original no trump are used to definitely measure your quick trick strength and in almost every case the no trump bid shows a minimum holding. However, in the One-Over-One, many users of the system make an opening bid of one no trump on a strong hand. If one no trump occurs, the contract is either two or four. In the minors it is either two or five.

It is probable that the intelligent user of this system requires greater experience than the use of the other systems. It is certain, however, that in the absence of duplicate competition, the users of this system have been extremely successful.

Whether their winning is due to the system or to the fact that they are master players is among users of other systems, a mooted question.

The next article will deal with variations and their variations.

Recipes For This Week

(By Betty Barclay)

OATMEAL COOKIES
1 1/2 cups special cake flour, sifted.
2 teaspoons baking powder.
1/2 teaspoon salt.
1/2 teaspoon cinnamon.
1 teaspoon cloves.
1/4 cup butter or other shortening.
1 cup sifted brown sugar.
1 egg, well beaten.
1/4 cup milk.

Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg. Add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoons on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 18 to 20 minutes. Makes 4 dozen cookies.

COCONUT BLANCMANGE

5 1/2 tablespoons flour.
1/2 cup sugar.
1/2 teaspoon salt.
3/4 cup milk, scalded.
1 cup coconut, premix shredded.
2 egg whites, stiffly beaten.
1 teaspoon vanilla.

Cream flour, sugar, and salt. Add milk gradually, place in double boiler and cook until thickened, stirring constantly. Add coconut and cool. Fold in egg whites, stiffly beaten. Serve 6.

FAVORITE CHARACTERS IN GENESIS

Golden Text: "We know that to them that love God all things work together for good, even to them that are called according to His purpose." —Romans 8:28.

Devotional Reading: Hebrews 11:22.

Lessons From the Life of Abraham.

The importance of Abraham is evidenced not only by the number of chapters in the Genesis devoted to his life but to the moral example he set and the faith both in the Old Testament and the New. Faith was the outstanding trait of Abraham. He was the first, as far as we know, to see life in another with a purpose. He knew God and communed with Him and his beautiful title is "The Friend of God."

Abraham appeared to Abram, and said unto him, I am God Almighty."

In the story of Abraham we see the belief in one God dispels the universalism of his time in many gods.

In the words of the Apostle Paul to Abraham the new understanding was born of his faith in God.

God is a Being who is omnipotent.

He is a Being who is benevolent.

He is a Being who is merciful.

He is a Being who is wise.

He is a Being who is just. He is a Being who is kind.

He is a Being who is omnipresent.

He is a Being who is all-powerful.

He is a Being who is all-good.

He is a Being who is all-right.

He is a Being who is all-nice.

He is a Being who is all-loved.

He is a Being who is all-happy.

He is a Being who is all-joyful.

He is a Being who is all-peaceful.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

He is a Being who is all-kind.

He is a Being who is all-merciful.

He is a Being who is all-just.

NEURITIS HAS GONE!

Banished by Kruschen

"I had acute neuritis in the shoulder and left arm, due to exposure in bad weather," writes the Rev. H. E. T. "It was impossible to get dressed or to use it in any way, and, of course, the pain was dreadful. All extant applications were useless. I got completely rid of it by keeping daily, early in the morning, Kruschen Salts in a basin of hot water. It took about a month for every vestige of neuritis to go."

Kruschen Salts can be safely trusted to do the job right.

Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Entirely New Reason

For Atlantic Flight

Doctor Hopes To Obtain Valuable Information As To Strain Imposed

An attempt to fly the Atlantic to gather medical information on the strain imposed on aviators during long-distance hops is to be undertaken shortly by a New York physician, a veteran commercial pilot and a girl who holds a limited commercial flying license.

The three are planning to fly non-stop from New York to Rome in the plane which Clyde Pangborn and Hugh Herndon used in their flight around the world.

Dr. Louis Piscilli, of New York, founder of the Flying Nurses' Association, will be a passenger. William Ulrich and Miss Edna M. Newcomer, of Hempstead, L.I., will co-pilot. Miss Newcomer plans to make a parachute jump over Florence, Italy.

Dr. Piscilli intends to place both Ulrich and Miss Newcomer on a rigid diet before the flight. He hopes to obtain valuable information on stamina, fatigue, diet and sleep schedules.

The plane is being conditioned at Roosevelt Field.

In Search Of Treasure

British Adventurers Locate Sunken Spanish Galleon In Southern Seas

A band of British adventurers who are seeking Spanish treasure made contact, recently, with a galleon on the bed of Chagaramas Bay, Trinidad, which they hoped was crammed with gold ingots and precious jewels.

The operations have been directed by a "divining spring" owned by Frank Cooper, one of the leaders of the group, who crossed the Atlantic in the "Vigilant," a tiny vessel, in the hope of making a great fortune.

It was reported that as the "Vigilant" was circling over the bay, the "divining spring" held in Cooper's clenched hands, leaped from his grasp.

Chagaramas Bay has long been looked upon as a place where treasure might be found. It was there that the Spanish were defeated by the British in a decisive naval engagement near the end of the eighteenth century. The legend is that the Spanish fleet contained one vessel loaded to the rails with gold and gems.

Special Fellowship Awards Announced

Students of B.C. and Saskatchewan Are Among Winners

The school of graduate studies in the University of Toronto, has announced awards of special fellowship open to graduates of other Canadian universities. The successful candidates are:

J. R. Daniels Beall and Miss M. J. Fisher, University of British Columbia; H. M. Chisholm, Dalhousie University, Halifax, N.S.; E. O. Brattin, University of Saskatchewan.

Columbus, on his second voyage to the New World, brought sugar cane to San Domingo.

"Have you any brothers and sisters?" "No, I am all the children we have."—Lustige Kolner Zeitung, Cologne.

GOVERNMENT IS SUSTAINED IN MANITOBA VOTE

Winnipeg, Man.—Hon. John Bracken will be Prime Minister of Manitoba for another five years. The general elections resulted in the return of government candidates on a sweeping scale.

The result of the voting puts the stamp of popular approval on the recent Liberal-Progressive coalition. Col. F. G. Taylor, Conservative leader, declined to join a coalition government when it was proposed by Premier Bracken last autumn. Col. Taylor stands elected in his own constituency of Portage la Prairie, but many of his followers went down to defeat.

Chief opposition to the government was provided by the Conservatives who contested practically every constituency in the province and waged a strenuous campaign.

With 13 candidates in the field, the Independent Labor Party waged a lively fight in Winnipeg and a few other ridings. Early returns showed only one Labor man, John Queen of Winnipeg, elected.

One cabinet minister, Hon. Ewan McPherson, one of the new Liberal recruits to the cabinet, went down to defeat in Portage la Prairie before the popular Conservative leader, Col. Taylor.

Sandford Evans, chief financial critic of the Conservative opposition in the Manitoba legislature, was assured of election in Winnipeg as early returns showed him far in the lead of the other 26 candidates contesting the city's 10-member constituency.

Mr. Evans is one of the best known Conservatives in Manitoba and is known throughout Canada as an authority on grain trade and business statistics.

A. B. Roblin failed in his first attempt to follow his father, Sir Redmond Roblin in a political career. Sir Rodmond was the last Conservative Prime Minister of Manitoba, but his son, running as a Conservative in Dufferin, was unable to capture the seat.

Decision Rests With Immigration Minister

Alleged Communists Have No Further Recourse To Higher Courts

Halifax, N.S.—Fate of the group of alleged Communists, who have been detained in Halifax for some weeks while their efforts to evade deportation were before the courts, now rests solely in the hands of the minister of immigration, Hon. Wesley A. Gordon. It was stated by L. A. Ryan, counsel for the group, that there was no further recourse to higher courts as the decision of the full bench of the supreme court of Nova Scotia had been unanimous.

Arms Conference Has Suspended Activities

Discussions On Disarmament Postponed For An Indefinite Period

Geneva, Switzerland.—Disarmament has been temporarily sidetracked and war debts and reparations discussions came to a standstill, almost on the eve of the Lausanne financial conference.

The World Disarmament Conference suspended formal activities for an indefinite period pending private conversations among political leaders looking toward some solution of the disarmament problem.

Prepared For Eventualities

Fascists In Germany Will Face War If Necessary

Berlin, Germany.—The German Fascist party "will not shrink war if it is the only way to defend our political and social freedom," Gregor Strasser, head of the entire organization of Adolf Hitler's party, declared in the first political broadcast any German government has permitted a Fascist to deliver.

"We National Socialists do not desire a new war," Strasser said, "but we will not shrink from war."

Making Maiden Trip

London, England.—The "George," which shares with the "Britannic" the honor of being the largest British-built motorship in the world, will sail on her maiden voyage from Liverpool for New York on June 25. A member of the White Star fleet, she is a 27,800-ton vessel.

W. N. U. 1947

Big Car Contract

Ford Motor Company Of Windsor To Supply English Firm

East Windsor, Ont.—On his return from England recently, Wallace R. Campbell, president of the Ford Motor Company of Canada, announced that a contract had been entered into by his firm with the Ford Motor Company of England whereby the Canadian company will supply the English firm with \$3,000,000 worth of Ford V-8 engines during the next 12 months, and with 1,500 to 1,800 complete V-8 cars, scheduled for delivery in August.

The Canadian company will distribute the new 8 horsepower English Ford in its export markets. New Zealand, Australia, South Africa, Africa, Malay States and other British territories, while the English company will sell the V-8 in Great Britain, Spain, Sweden and other European and Asiatic countries, for which the English Ford company holds selling rights.

Mr. Campbell emphasized that the business was taken at extremely close figures and represents practically 100 per cent payroll in Canada, not only at the East Windsor plant but at Toronto and other tire and parts manufacturing centres.

Burial Of Violet Sharpe

Brief Services Attended By Acting British Consul-General

Englewood, N.J.—Violet Sharpe, English servant girl in the home of Mrs. Dwight W. Morrow, was buried after a brief service attended by fellow members of the Morrow household and the acting British consul-general, who has been instructed to make a report on the girl's suicide five days ago.

The simple cloth-covered casket was borne to a grave in Brookdale cemetery, where rests the body of the late Senator Dwight W. Morrow, grandfather of the murdered Lindbergh baby, on the shoulders of four male employees.

No member of the Morrow or Lindbergh family attended the funeral rites, although they were represented by Arthur Springer, the late senator's private secretary, and Mrs. Josephine D. Graham, Mrs. Morrow's private secretary.

British Immigration

Question Has Not Yet Come Up For Discussion At Inter-Provincial Conference

Edmonton, Alberta—Commenting on Senator A. D. McRae's suggestion as reported from Winnipeg, to the effect that the question of British immigration to western Canada be considered at the forthcoming inter-provincial conference in Regina, Premier J. E. Brownlee says that he has not had a communication from, and he presumes that if the Dominion government were proposing to put it on the programme for the inter-provincial conference, advice to the provincial governments would have been given accordingly.

If occasion arises, however, the Alberta Government will be prepared to express its views on such immigration, says Mr. Brownlee.

Bloodless Sea Fight

British Rum Runner And U.S. Cutter In Engagement

Halifax—Tales of an old-fashioned sea scrap, in which the crews of a British rum-runner and a United States cutter battered each other with potatoes, turnips, paint pots and molasses jugs about 70 miles off New York, were told here after the motorships "Ganef" and "Mary F. Ruth" limped into harbour.

Masters of both vessels claimed they had been rammed by the cutter "Daphne," the "Mary F. Ruth" on Friday, and the "Ganef" on Sunday. The "Ganef" had a large hole in her stern.

Advisory Committee

London, England.—The creation of an advisory committee representative of all sections of the British timber trade to accompany the British delegation to the Imperial Economic Conference at Ottawa was strongly urged by Lord Lovat in the House of Lords. The government's representatives should be adequately informed on the technical aspect of the question, he said.

Will Attempt Speed Flight

New York.—Before taking off for Nashville, Tenn., Cyrus Peabody, a veteran military and commercial pilot, announced that within the next few weeks he planned a speed flight from New York to England, France and Germany.

MAKING MAIDEN TRIP

London, England.—The "George," which shares with the "Britannic" the honor of being the largest British-built motorship in the world, will sail on her maiden voyage from Liverpool for New York on June 25. A member of the White Star fleet, she is a 27,800-ton vessel.

W. N. U. 1947

Hold Station Master Responsible For Wreck

Death Sentence Imposed and Other Employees Get Prison Terms

Dnieperetrovsk, U.S.S.R.—The death sentence was imposed upon the railroad station master at Zemboya and his assistant who were convicted of responsibility for a wreck near the station in which a number of passengers were killed.

It was a head-on collision between two trains and the station master was charged with having mixed the signals while he was intoxicated. Thirteen other railroad employees, including the crews of both trains, were sentenced to prison terms of one to ten years. One man was exonerated.

Receives Heavy Sentence

Gaston B. Means Convicted On Swindling Charge

Washington.—Gaston B. Means was sentenced to 15 years' imprisonment for swindling Mrs. Evelyn Walsh McLean of \$104,000 in an alleged plan to return the kidnapped Lindbergh baby.

Justice James M. Proctor in the District of Columbia Supreme Court sentenced the former Justice department investigator to 10 years on the larceny of \$100,000 ransom and five years for larceny of the \$4,000 expense money. The latter sentence is to begin after the 10-year sentence has been fulfilled.

Demand High Wages

Australian Jobless Refuse Pay Offered By Grape Growers

Sydney, Australia.—The date has made some of the jobless here rather particular about the kind of work they are willing to accept. At Mudgee, centre of the vineyard district, grape growers agreed to give preference of employment in the picking season to local men on the dole. They offered \$2.50 a day with meals and quarters added. The work was rejected.

Besides the promise not to foreclose arrangements to make payments in grain were being reached.

Kiwans International

Delegates From All Parts Of Canada Attending Convention At Detroit

Detroit—Canadians from all parts of the Dominion arriving here for the 16th annual convention of Kiwanis International are prepared for four days of problems pertaining to unemployment aid, urban-rural relations, child welfare, adult education, and civic betterment.

Kiwanis was founded in Detroit on January 21, 1916, and the thousands of Kiwanians from all parts of Canada and the U.S. crowding into the city consider the occasion a pilgrimage back to the birthplace of the service organization. "We are justified in our faith in the future of Kiwanis," declared William O. Harris, of Los Angeles, International president, in his annual message. "We can be proud of our past accomplishments, and our present opportunity lies in the willingness to serve in the social and economic problems that we face today."

The Canadian delegations are in charge of three district governors:

Charles A. Fowler of Halifax, N.S.; Ontario Quebec Maritime district; Dr. P. Whitley of Swift Current, Sask., Western Canada district; and Clinton S. Hartley of Seattle, Pacific Northwest district.

Two international officers, Andrew G. Gaul of Hamilton, Ont., vice-president, and Dr. Charles C. Tatham, of Edmonton, trustee, will take leading parts in the convention.

Over 1,800 Kiwanis clubs across Canada and the U.S. will meet simultaneously. This united fellowship occasion will bring together over \$9,000 men for an expression of gratitude for the community betterment and welfare work of Kiwanis during the past year.

All Kiwanis clubs in Canada are observing Canadian citizenship week, June 26 to July 2, with patriotic programs. The observance is being directed by the Kiwanis International committee on public affairs for Canada. H. Stanley Higgins of Ottawa is chairman, and Nelson A. Harness, Vancouver, and Richard W. Moore, Saskatoon, members of the committee.

Gold Rush In Manitoba

Big New Strike Is Reported Near Island Lake

The Pas, Man.—Prospectors are flocking to the scene of what is believed a big new gold strike. The find is some 40 miles northwest of Island Lake, where important gold showings were found during the winter. A rush of claim stakers from the Island Lake district followed news of the strike.

Details of the find have not come out, but it is stated samples taken to Island Lake are richer than those found in that area which started a big airplane rush from Winnipeg a few months ago.

Open Coastal Service

Vancouver, B.C.—The summer service between Vancouver and Skagway was officially opened by the Canadian National Steamships when S.S. Prince George, Captain Neil MacLean, sailed from this port June 13.

FOREST FIRES CAUSE HEAVY LOSS IN ONTARIO

Port Arthur, Ont.—The number of men fighting fires in the Thunder Bay area has now reached 700, equal to the largest number employed last year.

Blazes at Whiteside Lake and Obonga Lake are requiring extra crews, officials said, and 50 additional men have been sent to Sunday Creek to cope with the rapid spread of fire in that district.

The largest fire in the area is about 30 miles north of Graham, but although it covers about 50 miles of territory, it is not the most destructive being mostly in young growth.

To fight fires at Whiteside, Obonga and Dog Lakes, and at Gull River, all men and equipment must be taken in by plane.

Fire to the northwest of Dog Lake, about 20 miles from Port Arthur, destroyed a group of camps of the Pigeon Timber Company valued at \$4,000,000. A camp which had cost \$6,000 a day and 10,000 feet of lumber also fell prey to the flames.

Joseph Martinfield, 55, and Con Mahoney, 22, two members of a fire-fighting brigade, lost their lives in Onion Lake when a canoe in which they were riding overturned.

Sudbury, Ont.—Valuable timber is believed to be endangered by a bush fire which was ravaging some 3,000 acres of bush land near Gogama, north of here, according to word reaching Ontario forestry offices. The blaze is being fought by 200 men.

One casualty was reported. Paul Natatka was injured and badly burned when struck by a falling tree.

CONFERENCE AT OTTAWA MAY BE VERY BRIEF

London, England.—The British Government and the governments of the Dominions share the belief that proceedings of the Imperial Economic Conference at Ottawa must not be long drawn out, said J. H. Thomas, Secretary of State for the Dominions, in a statement on the conference in the House of Commons.

"No possible preparatory work has been left undone on this side," the minister said, and if the other had acted likewise the conference would not fail in its task of securing greater and freer trade.

Tariffs and imperial preferences, the nationalization of industries, monetary and financial questions including the whole question of currency and migration, would all be taken up by the conference, said the minister.

"The United Kingdom Government," he declared, "will advocate the establishment of machinery representing the dominions that will keep them in daily contact."

Reconciliation of the divergent interests of the different sections of the empire was a great and difficult task, but a worthy one, which the great mass of people were hoping would be accomplished, Mr. Thomas said. "If we can help each other," he added, "what an example that will be to the world."

Winnipeg Bank Robbery

Bandit Tie Up Staff and Escapes With \$5,000

Winnipeg, Man.—A lone robber entered the Corydon and Osborne branch of the Royal Bank of Canada here just before closing time Thursday afternoon, June 16, securely bound the small staff and made a neat getaway with \$5,000. The robbery was not discovered until one hour later. With the exception of the staff or four the bank was empty at the time.

Nonchalantly strolling up to the teller's window as if to make a deposit, the armed man held a revolver and ordered strict silence.

Stepping behind the counter he hustled the four employees to the rear of the premises, calmly but efficiently trussed them up with a coil of whipcord, scooped \$5,000 from the teller's till and then telephoned for a taxi.

One hour later, a passerby noticing the bank doors still open, paused to investigate. He found the four members of the staff lying on the floor, securely tied.

Hoover Re-Nominated

Carries Republican National Convention In First Ballot

Chicago.—President Herbert Hoover was re-nominated almost without opposition by the Republican National Convention.

In a first ballot walkaway endorsement which rallied to his standard all but a handful of states, Hoover received from the party concave a re-endorsement of the grant of leadership voted him four years ago at Kansas City.

A long, noisy and colorful demonstration had greeted the presentation of his name to the convention, with his home state of California leading the parade.

The re-nomination had been forecast months ago, and it only remained for the assembled delegates to give to their ratification the stamp of unmistakable emphasis. This they did with trimmings.

Exports Lower For May

Balance Of Trade Against Canada Was \$2,951,411

Ottawa, Ont.—The balance of trade was slightly against Canada in the month of May. Official figures issued through the Board of Trade of Canada show total exports of Canadian produce during last month at a valuation of \$40,594,404. In addition to this, exports of foreign products from Canada amounted to \$30,865, making total exports of \$41,402,299.

Total imports entered for consumption during the same month were \$44,353,710, of which \$16,027,203 were free goods and \$28,326,507 dutiable.

The balance of trade against Canada during the month was \$2,951,411.

Breaks World's Air Record

Desenzano Del Garda, Italy.—Lieutenant Neri, Italian service ace, flew 430 miles an hour to exceed the world's air record of 408.8 miles an hour, but he lost an elevation rudder on the final lap and his record was invalidated, it became known.

Pollution Of Fish Streams

Dominion Fisheries Inspectors On Watch To Prevent Injury To Country's Fish Life.

Savdust has its place, but not in streams frequented by fish, and part of the work of fisheries inspectors under the Dominion Department of Fisheries is to see to it that such waters in their respective territories are not polluted with mill refuse or other substances injurious to fish life.

But how does pollution, for instance, do harm to fish life? It has evil effect in two ways: By covering spawning beds it prevents the hatching of live fish from the eggs, and in the second place, it kills live fish by getting into their gills or breathing apparatus. Other kinds of waste—for instance, seepage from certain classes of industrial plants—are also injurious to fish life. It is because of natural resources which it is important to conserve that the Department of Fisheries requires that its officers in areas where the fisheries are under federal administration shall make careful inspection of mills, etc., along streams frequented by fish and check any operators who may thoughtlessly be allowing sawdust or other refuse to fall into the water. Steps of this kind are of importance from the standpoint of fisheries conservation, and conservation is essential in the interests of commercial fishermen and anglers alike.

In most cases where refuse from an industrial establishment is reaching a fish stream the condition is willingly and promptly remedied by the operator of the plant. In other cases it draws it to his attention. If this does not happen, however, prosecutions may be instituted under the Fisheries Act which provides that "no person shall cause or knowingly permit to pass into, or put or knowingly permit to be put, into, liquid chemical substances or drugs, poisonous matter, dead or decaying fish, or remnants thereof, mill rubbish or sawdust or any other deleterious substance or thing, whether the same is of a like character to the substances named in this section or not, in any water frequent ed by fish."

Planning Year-Round

Supply Of Oranges

Jamaica Hopes To Have Variety Making This Possible

Jamaica is planning to produce a variety of orange which will enable her to give a year-round supply, according to P. E. Holloway, president and managing director of Mutual Brothers, Montreal, Limited, who returned recently from a visit to the British West Indies. Hitherto, the Jamaica oranges have only been marketed between the month of October and March. Mr. Holloway emphasized that Jamaica can produce oranges as cheaply as anywhere else in the world and he stressed the desirability of regarding the island's product as the "Empire Orange."

"The day will come," he affirmed, "when the Canadian market will take its full citrus requirements from Jamaica. Jamaica is the natural market of the Dominion just as Canada is the natural country to supply the needs of Jamaica."

Prayed In Thousands

Among its Egyptian inscriptions, the Field Museum exhibits a prayer from an Egyptian lady's tomb, in which she asked for "1,000 loaves of bread, 1,000 jars of beer, 1,000 alabaster vases of ointment, and 1,000 garments."

Wife—"That's the kind of husband to have! Did you hear Mr. Dike tell his wife to go and look at some \$20 hats?"

Husband—"My dear, have I ever deprived you of the privilege of looking at \$20 hats?"

The boycott of foreign cloths in India has caused a 54 per cent. decrease in cloth imports.

"Mrs. Plitzke is said to be very economical."

"Yes, so economical that she uses another man to save her own husband."—Wahre Jakob, Berlin.

W. N. U. 1947

Use the Newspapers

Best Medium For Merchants To Use Advertising Dollars

Some firms which need business badly are taking bizarre means of attracting it—buying advertising bonbons for business enemies.

These are trying times for business—but time to use tried methods for getting business.

This is the time to use newspapers. The newspaper has not been discarded by depression. It still holds its circulation—and its audience. The audience wants it, and pays for it—every day!

The newspaper permits you to pick your better markets, and avoid advertising waste in poor ones; to reach customers to whom you can and do sell goods now.

The newspaper permits you to do serious advertising—in fact and reason, and argument to prove dubious dollars out of wary wallets.

The newspaper permits frequency of appeal—at very low costs.

For better sales and better business, mobilize your advertising dollars where they will do you most good this year—in newspapers.

"Mounties" Becoming Very Strong Force

Is Now At Highest Establishment Since Its Foundation

With a strength of approximately 2,100 officers and men, the Royal Canadian Mounted Police is now at its highest establishment since its foundation in 1873. In the last few months it has received an accession of strength nearly 800 all ranks due to the absorption of the customs preventive service and the provincial police of Alberta, Manitoba, and the three Maritime provinces. Only British Columbia, Ontario and Quebec continued to maintain separate police forces; and the expectation is that an agreement may shortly be concluded with the latter.

A unified protective force for the maintenance of the law in Canada is gradually being built up, with all the advantages that unified control con-

Berries By the Barrel

Mechanically Operated Runner Used On Track At Oxford University

Caretaker Of Grimsby Post Office Solves Problem Of Garden

George Warner, caretaker of the Grimsby Post Office, residing in apartments above this government building, has solved the problem of having a garden.

Early this spring he filled an old sugar barrel with earth, placed an old piece of the tile in the centre, bored 2-inch holes all around the barrel and planted strawberry plants in the holes. The plants grew and he now has 26 plants laden with green strawberries, as many as 20 perfect berries on a plant. The barrel is covered by a plants and sits on a pedestal at the back of the post office.

A Non-Existent Type

Few People Now Seem To Have Old Pioneering Spirit

Britain is over-populated, and Canada has room for millions. The problem is how to attract the men with outside work at home to settle on the vacated areas in this country. This old British settler is the man at the beginning of the nineteenth century who has evaporated. The present generation will not endure the hardships faced and overcome by the hardy men and women who took up land in Ontario from the Ottawa River to the St. Clair. They laid the foundation of our Dominion, but that type does not exist.

Drivers Need Instruction

Many Operating Cars Pay No Attention To Rules

There is great need for some system of instruction of motor vehicle drivers, if there is ever going to be improvement in the accident record. There are many people driving cars whose performance is such as to suggest that a license should not have been issued. Good motor cars are property too costly to be left at the mercy of operators who either have never bothered themselves to learn the driving rules or who are incapable of following them.

One hears a great deal about the absent-minded professors, but none more absent-minded than the dentist who said soothingly as he applied the pliers to his automobile,

"Now, this is going to hurt just a little."

Animal diseases cost farmers of England \$100,000,000 last year.

Sirius is the most brilliant star in the whole sky.

ROYALTY LOOKS INTO THINGS

Even royalty is curious and sometimes likes to look inside to see what makes things go. Here is the former Crown Prince Wilhelm of Germany (bending over), apparently deeply interested in the powerful engine of Sir Malcolm Campbell's racing car. The world-famous British speed king, standing behind Prince Wilhelm, recently competed in the International Auto Meet in Berlin.

Scarecrow Had Grim Origin

Is Symbol Of Human Sacrifice Made In Dark Ages

The scarecrow was not invented to scare crows. According to the antiquarians, it had a "grimmer" origin than that. It originated with those dark ages when every enterprise was attended by human sacrifices.

When a ship was launched a human life was sacrificed (this is now symbolized by the breaking of a bottle of wine). When a building was begun, again a life was sacrificed (now symbolized by the laying of a foundation stone). So the farmer, anxious to appease the gods of the weather and to ensure good crops, made his sacrifice. Gradually the practice of human sacrifice died out, but the farmer bowed to ancient superstition to the extent of putting up an effigy in his fields to please the gods.

Robot Athlete Sets Pace

Mechanically Operated Runner Used On Track At Oxford University

Like the mechanical rabbit that leads the whippets in a dog race, a robot athlete is being used to set the pace for the track men at Oxford University, England. The figure of a runner, mounted on a mechanically operated rubber-tired wheel, moves around the outside of the track at different speeds. By keeping abreast of the speeding robot, the varsity men learn to judge the pace at which they are running. The innovation is said to be of special value in training distance runners, whose success largely depends upon their ability to pace themselves so that they can reserve sufficient strength to carry them through the final sprint.

Princess Has Eye Operation

A preliminary operation for removal of a cataract from the right eye was performed on the Princess Beatrice, aunt of the king. The operation took place at Kensington palace. Princess Beatrice is the daughter of Queen Victoria and the mother of former Queen Victoria of Spain. She was 75 years old in April.

The average person in Switzerland eats 23 pounds of cheese a year; in this country the average is less than five pounds.

There are 1,900 radio broadcasting plants in the world valued at nearly \$29,000,000, and the annual cost of new public works and railway and port improvements is about \$72,000,000.

Hay and Pasture

Varieties Of Crops Grown As Food For Livestock Are Limited

Take a drive into the country a little later in the season and see the different kinds of crops being grown in the farm fields. Some of these provide grain while others are primarily for grain and pasture. Of these latter, only rarely will crops be found other than sweet clover, western rye grass, and bromo grass.

It must seem curious to the average person that one can count on the fingers of two hands the number of important crops that are grown to any extent as feed for livestock, while as a matter of fact, there are actually thousands of distinctly different kinds of grasses and legumes growing wild. Surely some of these plants which grow naturally should be equally as good or better than those which now occupy the fields.

Undoubtedly there are still valuable discoveries to be made but before these can qualify as field crops they must pass a very rigorous test with respect to several important qualities.

The truth is that exceedingly few of these wild plants can be cultivated or can be called "crop" plants perfectly. Before a hay or pasture crop can ever become widely used, it must be able to produce a satisfactory yield of hay or pasture and plenty of good seed; it must have good feeding quality and be able to resist disease and compete with weeds. It must also be winter-hardy, drought resistant in some areas and able to mature seed in our comparatively short growing season. Not only do crops differ in these respects but some varieties of the same crop are much more satisfactory to others.

It is clear that accurate knowledge is required to enable farmers to decide what to grow and how it should be grown. This need is being supplied throughout Canada which are able to give this service by virtue of their excellent facilities and wide experience with farm requirements and varieties of field crops. Plant breeders are always on the lookout for valuable new plants and occasionally a discovery is made, as for example, Created Wheat grass in the Georgia provinces and Reed Canary grass for certain conditions in eastern Canada. The standard crops, also, such as sweet clover, western rye grass and bromo grass are being improved by selecting, testing and multiplying the seed from individual plants of special merit.—L. E. Kirk, Dominion Agrostologist.

MARGARET PEDLER

"The Splendid Folly...The Harriet" Hodder & Stoughton, Ltd., London.

CHAPTER XXXII.—Continued.

"Then, to please me—for nothing else in the world, if you like, but because I ask it—will you let them stay as they are for a few weeks longer? Just that little while, Nick? We're going to London next week. That'll make a break—bring us all back to a calmer, more everyday outlook on things. Will you wait? Sir Adrian may never strike Claire again. And it wouldn't be fair—just now, at a time when she is feeling horribly bitter and humiliated from that—that inuit—to ask her to go away with you. Give her a fair chance to decide a bit before we bring them when they are at their normal level—not when they are worse than usual. To ask her now would be to take advantage of the feeling she must have, just at this moment, that her life is unbearable. It wouldn't be playing the game."

He made no answer, and Jean waited with increasing trepidation. She was sure now that she could hear footsteps. Someone had mounted the stairs and was coming along the corridor towards her room.

"Nick!" The low, agitated whisper burst from her as she stepped half outside the door. "Promise me!"

Do each vegetable up in its own bag of Caspar Cookery Parchment.

There won't be any odor, nor can you smell the parchment. The flavor will be retained. And you use only one burner turned low for cooking. The flavor will not mix.

Do the same with boiled or steamed fish. You'll be delighted with the results. No fish odor in the kitchen. No saucers or kettle to clean up. When preparing fish, however, with Caspar Fats or Oils, it doesn't burn. No more scraping or scouring of the pan afterwards.

You can use Caspar Cookery Parchment to simplify the task of hanging laundry to dry. It doesn't absorb odors. Makes a perfect dust cloth. Silky, strong, and doesn't spread silk. Made of the finest fibers of the famous PARASAN Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores have Caspar on sale, but if you haven't, send this coupon to the makers and we'll give you a new and money booklet entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Applified Paper Products, Ltd.,

Enclosed find \$1.00 for which please send me one full size package of Caspar Cookery Parchment and your 100 recipes for "Leftovers".

that we weren't meant to run away from things—hard things. If a man and a woman marry, they must accept their responsibilities—not evade them."

So absorbed was she in her trend of thought that she never realized how directly this speech must strike at Blaise himself. His face changed slightly.

"You're right, of course," he said abruptly. "You—generally are. And if all women were like you, it would be easy enough."

His eyes dwelt with curious intentness on the pure outline of her face, on the parted, tenderly curved lips, and the golden eyes with their momentary touch of the idealist and the dreamer.

It seemed as if the quiet intensity of his regard drew her, for slowly she turned her head and met his gaze, flushing suddenly and faltering under it. The consciousness of him, of his nearness, swept her from head to foot, and it seemed to burn as though now, in this moment, they were in that soft, touchy, nearer understanding that had ever been.

She stood there still and quiet when he had gone, realizing in every quivering nerve of her that whatsoever the future might bring—even though Blaise might choose to shut himself away from her again as in the past and the dividing wall between them rise as high as heaven—she knew now, without a shadow of doubt or questioning, that he loved her.

In the burning utterance of a single word, in the pressure of passionate, renouncing lips, the assurance had been given, and nothing could ever take it away again.

She spread her hands, palms upward, and looked at them curiously.

CHAPTER XXIV.

An Unexpected Meeting

"Have you been very bored, Nick?" The week in London had nearly run out, and Lady Anne's eyes begged charmingly for a negative. Nick accorded it with a smile.

"I'm never bored," he said. "And take whatever of happiness she can get out of her hand."

"You know you don't mean that. You don't really believe in snatching happiness—at all costs."

"I'd let precious little stand in the way. If I were Nick I think I should do it."

"But you?"

Jean did not know what unaccountable impulse induced her to give a personal and individual twist to what had been developing almost into an academic discussion. Perhaps it was the familiar, unsatisfied longing to hear Blaise himself define the thing which kept them apart—even though, since Lady Anne's disclosure, she could guess only too well what it was. Or perhaps it was the faint, tormenting hope that one day his determination would weaken and his love sweep away all barriers.

He looked at contemplatively. "Sometimes the past makes claims upon a man which forbid him to let go at happiness. I don't believe in giving up drinking, his bad habit for the evil he has done. What he has brought on himself, that he must bear. But Nick and Claire have had no part in bringing about their own tragedy. They are just the sport of chance—or of an ill fate. They are morally free to take their happiness in a way in which I shall never be free to take mine, as long as I live." He regarded her steadily.

"There are certain things for which I have proved myself unfitted—with which it is evident I am not to be trusted. And one of those is the safeguarding of any woman's happiness." Jean felt her throat contract. It would always be the same! Then! The long tentacles of the past would reach out eternally into the future. The woman who had been his wife—the woman who had destroyed herself, and, in so doing, hanged a milestone of remorse about his neck—would stand forever at the gateway of the garden of happiness, her dead lips silently denying him—and, with him, the woman who loved him—the right to remember.

With an effort Jean answered that part of his speech which had reference only to Claire and Nick.

"There are other ways, though, in which they have no moral right. I grant that Claire was persuaded, almost driven into marrying Sir Adrian by her parents, but, after all, we each have our individual free will. She could have refused to obey them. Or, if she felt there were reasons why she must marry him—the material advantage to her parents, and so on, why, she ought to have reckoned the cost. I don't mean to be hard, Blaise."

"You—hard!" He laughed a little, as though amused.

"Only—only one must try to be fair all round—to look at things straight."

She leaned her chin on her palm and her eyes grew thoughtful.

"I don't know, but it seems to me

Trying Out New Plan

Celery To Be Cultivated in Canada For Bermuda Growers

A plan to cultivate celery in Canada between June and October, transplant it in Bermuda and harvest it for export to Canada in February, has been made known by W. R. Evans, marketing adviser to the Bermuda Department of Agriculture. It is understood that an expert is coming to Montreal to plant the first seeds.

The scheme would advance the opening of celery shipment from Bermuda to Canada by two or three months.

Painting Eiffel Tower

Engineers Think Structure May Become Menace In Twenty Years

The Eiffel Tower is forty-five tons heavier than it was last year. That is the amount of paint that forty-five painters are applying to the giant steel skeleton, still the third highest structure in the world. Only the Empire State and Chrysler Buildings in New York are taller.

Paris engineers went over the tower on an annual inspection and found it in good shape. Several engineers say that it can stand for another century before it will have been worn out by the elements, but most engineers agree that it may become a menace in twenty years.

Some seasons no wind is unfriendly; some seasons we plant come to bloom, and usually we have trodden so blindly Leads us up from the shadows and gloom.

The bridge is into the light Where we know life bright

They're taking an unconscionable time to dress."

This latter had come in late from a sightseeing expedition undertaken on Jean's behalf, and had only returned to the hotel just as Lady Anne and Nick were preparing to make their way in to dinner.

"For such a deliberate matchmaker, you're a lot too impatient, madam," commented Nick teasingly.

"That they should have stayed out together until the very last moment ought to have pleased you immensely."

Lady Anne made a small grimace.

(To Be Continued.)

Fish and How To Cook It

Dominion Department Of Fisheries Issues New Booklet Printed In Both French and English

Copies of the new book, "Fish and How To Cook It," which has been issued by the Dominion Department of Fisheries, are now available either in French or English at a price of ten cents each. The booklet has been prepared under the direction of Mrs. Eveline Spencer, specialist in fish cooking, who is now on the department's staff. It gives authoritative information and is designed to meet the needs of the average Canadian household. Persons wishing to receive the booklet should write the Deputy Minister of Fisheries, Ottawa, enclosing ten cents for each copy required and stating whether the English edition or the French edition is desired.

Honor the Dead

The Gravels of Redcoats killed in battles of Concord and Lexington 157 years ago are not forgotten.

Annually delegates of the British Naval and Military Veterans' Association of Massachusetts make a pilgrimage here to place wreaths on them.

Scotland has a safe-driving campaign.

Animal diseases cost farmers of England \$100,000,000 last year.

By Lydia E. Pinkham's Vegetable Compound

Cried Herself to Sleep

All women have splitting headaches and feel like this sometimes. Lydia E. Pinkham's Vegetable Compound relieves cramps.

Wise and experienced mothers know that children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is good in clearing the system of worms and removing those unhealthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

The tower is being painted yellow and brown, which all Parisians agree is not pretty. Engineers say that paint of those two colors will increase the life of the tower. One American firm offered to paint the tower with aluminum paint just for the publicity, but this was opposed.

Wise and experienced mothers know that children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is good in clearing the system of worms and removing those unhealthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

Wise and experienced mothers

Milan, Italy, was once the great centre of trade in silks, velvets, and other fine wearing apparel, and any merchant dealing in Milan goods was known as a Milner. In addition to hats and gowns, gloves and stockings, the original Milner also dealt in glass, cutlery and inlaid armor. As trade became more specialized, however, the Milner, or milliner, as he gradually became known, confined his attention to women's wear, and finally to hats alone.

Women Outnumber Men

A fifth of the total population of

England is female, and the number

of women exceeds that of men by

one million, according to the latest

census figures, now made public.

The population of Glasgow is given as 1,085,461, with

107 females for each 100 males. In

Edinburgh the women outnumber the men by 12 to 10.

Alaska seal herd is estimated at

more than 1,000,000 animals.

Little Helps For This Week

"Come unto Me, all ye that labour and are heavy laden, and I will give you rest."—Matthew xi. 28.

Come unto Me, sacred voice, will guide you to your home, where you will find shelter, hidden balm that flows for every wound, Peace that ever shall endure,

Anna Laetitia Barbauld.

Christ's invitation to the weary and heavy laden is a call to begin life over again upon a new principle. "Watch My way of doing things." He says: "Show me, take life as I take it; be meekly lowly, and you will find rest."—Henry Drummond.

Relieve Asthma at Little Expense.

Thousands of dollars have been vainly spent upon remedies for asthma and sputum, if ever, with any relief. Dr. J. D. Kellogg's Asthma remedy, despite its cost, is of benefit, costing so little that it is within reach of all.

It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your doctor can supply you.

Buckwheat Destroys Weeds

Among the many uses of buckwheat as a field crop, none is more important than its value as a weed destroyer, states crop specialists of the Dominion Experimental Farm. Its value in this connection arises from its quick germination and rapid growth. The fact that two crops of buckwheat can be raised during one year usually makes it particularly effective in the eradication of even such difficult weed problems as those presented by the sow thistle and quack grass.

Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved by Dr. Williams' Pink Pills.

"I was terribly bothered with a bad back and rheumatism in my shoulders," writes Albert Berger, Wingle.

"One day I got so bad I had to stop work and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the pills a fair trial, and they worked right off. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend this for anyone suffering from Rheumatism, Lame Back, Sciatica."

Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pill is a blood builder, and it causes new red blood cells, which is the reason they are successful in combating such ailments. Equally good for all round and nervously exhausted people.

Try them. At your druggist, 50c.

THE CHRONICLE, CROSSFIELD, ALBERTA

OBITUARY

Wm. FIELDHOUSE

The residents of Crossfield and district were shocked to learn of the death on Monday morning of Mr. Wm. Fieldhouse. He left Crossfield on Saturday afternoon to spend the week-end at the home of Mrs. Fieldhouse in Calgary, and was apparently in the best of health. About ten o'clock on Saturday night he was stricken with a heart attack and was removed to the General Hospital, where he passed away

some four hours later.

Mr. Fieldhouse was born in Bradford, England, and was in his 67th year. He came to Macleod, Alberta in 1902, where he resided for fifteen years, coming to Crossfield in 1917, he purchased land south of town where he has made his home ever since.

In addition to his widow, Mr. Fieldhouse leaves two daughters and two sons—Mrs. R. G. Alexander, Vancouver, B. C.; Mrs. M. Erickson, of Lethbridge, Tom of Crossfield, and George of Nelson, B. C.

The funeral was held on Wednesday from the United Church, Rev. H. Young conducting the service. The pallbearers were F. Collicutt, Geo. Murdoch, E. Michel, W. Walroth, A. Melling, and E. B. DeWitt.

JAMES GILCHRIST

The many friends of James Gilchrist of Maple Creek, Sask. will regret to learn that he passed away on Thursday of last week after a short illness at the age of 86.

The late Mr. Gilchrist was well-known in Crossfield, and up until the past two years frequently visited his son here.

Mr. and Mrs. J. R. Gilchrist attended the funeral which was held at Maple Creek on Saturday.

To Play at Irricana

Crossfield will play a return game at Irricana on Friday evening.

BASEBALL

Irricana 14—Crossfield 7

Irricana got away with the long end of 14 to 7; score here on Sunday afternoon, when the locals after playing fair ball for six innings went to pieces and handed the game to Irricana on a platter.

George McKay pitched good enough for Crossfield to win and his mates collected enough hits to win two or three ball games, but the fielding was awful.

C. H. McMillan handled the indicator, and his decisions were disputed on several occasions, but at that he got away without being killed. "Mac" a former ball player, has no desire to make the big league as an umpire.

Madden 2—Crossfield 1

Manager Bills trotted out a team of youngsters and a few old hands against Madden on Wednesday night, and we lost another ball game, the score being 2-1.

The game was a pitchers battle between the Maddens—Tom Borbridge, and Crossfield's young recruit Ronnie McFadyen. Both pitchers were good and hits were few. McFadyen losing the game in the sixth inning on a wild pitch. Madden has a nicely balanced club, the infield being especially good.

Madden—T. Borbridge and K. Borbridge—Crossfield—R. McFadyen and E. Bills.

A. J. Hunter umpired and gave good satisfaction.

HAIL has started to fall, two storms reported already this season, if you are going to insure, why NOT?—A. W. GORDON.

Dog Pound News

The Alberta Government Telephones are installing phones in Parsons General Store and the Midland Pacific Elevator at Dog Pound this week.

J. H. Harrison shipped a car of hogs out of Dog Pound this week.

Don't forget that Dog Pound baseball team will play at Cremona on Saturday evening at 6:30. The boys are looking for revenge too.

Dog Pound won the league game from Water Valley on Saturday on the local diamond. The score being 19-11.

The locals dropped an exhibition game at Bottrel on Sunday by a score of 10-8. R. Pratt of Calgary who was catching for Bottrel, had a finger broken from a foul tip. Manager Lake Parsons cracked out a long home run in the ninth inning, but unfortunately for Dog Pound there was no one on the bases when Lake made his lusty wallop.

Our new pitcher, Fay Stone, got away to a good start on Sunday at Bottrel by striking out seven men in six innings.

There will be a meeting in the U. F. A. Hall on Wednesday evening June 22nd at 8 o'clock for the purpose of appointing a sports committee. It is expected that plans will be made for the holding of a Stampede.

MEMORIAM

HARRY HEWITT
A silent chord in memory heart
Is softly touched today.
Lovingly remembered by his Daddy,
Mother, Sister and Brothers.
Cremona, June 20, 1932.

In loving memory of
Mr. J. B. McNicol
Who passed away June 23, 1931.

Inherited by
Mrs. M. McNicol and children.

Card of Thanks
Mrs. Wm. Fieldhouse and family
wish to thank all the friends and
neighbors for expressions of sympathy
and deeds of kindness during
their recent bereavement.

Horseshoe Club
The first horseshoe tournament
of the season was played at the
park on Saturday evening, with a
good turn-out present. Jim Aldred
and John Zanni won the first prize
and Clarence Havens and Carl
Becker went home with second
money.

The McCool cup contest proved
a real thriller, and Clarence Havens
and Jim McCool were extended to
the limit to stave off the determined
challenge of Harve McCool and
Russ Nichol. The score of 50-47
tells its own story.

Jim and Charlie Aldred will play
for the cup on Saturday evening at
6:30 sharp. These Aldred boys
seem to be hitting on all fours,
and will make Clarence and Big
Jim go the limit.

The cup games will start at 6:30
sharp, and the usual weekly tourna-
ment immediately after.
